- Practices: Agile (Scrum), Test-Driven Development (TDD), RESTful API design.
- Cloud Platforms: AWS, Azure, Google Cloud.
- CI/CD: GitHub Actions. Git Bucket.
- Databases: MySQL, PostgreSQL, MongoDB, DB2, Firebase.

## Professional Summary

I am a motivated Software Engineer focused on backend development, passionate about innovation and creating effective solutions. My recent graduation, online courses, work experience, and participation in Hackathons have given me a solid foundation in computer science and an interest in new technologies like blockchain, AI, robotics, and drone systems.

As a space enthusiast, I am driven by the link between technology and exploration, always looking for ways to push limits and develop transformative solutions. Outside of technology, my experiences as an athlete and gardener show my commitment to growth, resilience, and precision, which I apply to every project I work on.

## Work Experience

05/2024 - now

### Standard Bank SA, Johannesburg

- Software Engineer intern,
- Developed project concepts and maintained optimal workflow
  - Collaborated with other developers to manage large, complex design projects for clients
  - Worked on COBOL and JCL programs on IBM Z mainframe systems
  - Participated in batch job scheduling, debugging and testing legacy banking systems.
  - Collaborated with cross-functional teams to modernize existing services.
  - Carried out quality assurance tests to discover errors and optimize usability.
  - Kept detailed records of releases and software fixes for optimum traceability.

## Education

2021 - 2023

### IIE Varsity College, Midrand

- Bachelor of Computer and Information Sciences in Application Development,
- Activities and societies: VC Cares, Athletics, and Hackathon
  - Developed multiple software solutions using different tools and collaborated with various group members to tackle real-world problems.

## Languages

isiZulu & English — Fluent
